STARSHIP COMBAT SEQUENCE

1. Declare Actions and Full Reaction Skills. Characters declare all actions for this combat round (movement, haste, skill, attribute use, or full dodge evasion). The character (PC or NPC) with the lowest *Dexterity* code declares actions first, followed by other characters in ascending order of *Dexterity*. If a PC has the same *Dexterity* code as an NPC, the NPC must declare first.

2. Declare Combat Reaction Skills. Characters declare combat evasions, or other reaction skills, including shielding. Haste for reaction skills, including full reactions, may be increased. The character with the highest *Dexterity* code declares first, followed by other characters in descending order of *Dexterity*. If a PC has the same *Dexterity* code as an NPC, the NPC must declare first.

3. Roll Actions and Reactions in Order of Haste. Non-movement actions and reactions with the same degree of haste are resolved, followed by all movement actions with that same degree of haste. Characters roll skill dice for their actions. The gamemaster determines the to-hit and other difficulty numbers for this combat round.

4. Calculate Damage as Hits Occur. Roll damage, hull or strength dice for all targets hit by an attack, and determine the effects according to the "Damage Summary" chart.

STAR WARS CHARTS

This section replaces the bottom portion of the "Weapons Chart" on page 139 of the role-playing game rulebook.

Melee Weapons

	Damage	Difficulty Scale
hands	str	3-5
club	str+1D	3-5
gaderffii	str+1D	3-5
spear	str+1D+1	6-10
vibroaxe	str+2D	11-15
vibroblade	str+1D+2	11-15
lightsaber	5D**	16-20

* Damage at point-blank range (see *SW:RPG* page 47). ** Characters with the control skill add skill code damage. Anything less than 3 meters away is point-blank range for ranged weapons.

COMBAT SEQUENCE

1. Declare Actions and Full Reaction Skills. Characters declare all actions for this combat round — movement, haste, skill or attribute use, or full dodge or full parry. The character (PC or NPC) with the lowest *Dexterity* code declares actions first, followed by the other characters in ascending order of *Dexterity*. If a PC has the same *Dexterity* as an NPC, the NPC must declare first.

2. Declare Combat Reaction Skills. Characters declare combat dodges or parries. Haste for reaction skills, including full reactions, may be increased. The character with the highest *Dexterity* code declares first, followed by the other characters in descending order of *Dexterity*. If a PC has the same *Dexterity* as an NPC, the NPC must declare first.

3. Roll Actions and Reactions in Order of Haste. Non-movement actions with the same degree of haste are resolved, followed by all movement actions with the same degree of haste. Characters roll skill dice for their actions. The gamemaster determines the to-hit and other difficulty numbers for this round.

4. Calculate Damage as Hits Occur. Roll damage and strength dice for all targets hit by an attack, and determine the effects according to the "Damage Summary" chart.
