

D6 Conversion Book Index

The following is a list of stat blocks included in the conversion guides created by the users at the Rancorpit Forums. The statistics are categorized and then alphabetized within that category. For each listing one can find the name of the stat, an abbreviation for the book in which it is found, and the page in the conversion guide on which it is found. For example “Khill KOTORCG 3” means that you can find the stats for a Khill on page three of the Knights of the Old Republic Campaign Guide conversion book. Below is a list of abbreviations:

SOTG	– Starships of the Galaxy	LECG	– Legacy Era Campaign Guide
TOTG	– Threats of the Galaxy	JATM	– Jedi Academy Training Manual
KOTORCG	– Knights of the Old Republic Campaign Guide	GAW	– Galaxy at War
FUCG	– Force Unleashed Campaign Guide	SGTD	– Scavenger’s Guide to Droids
SAV	– Scum and Villainy	GOI	–Galaxy of Intrigue
CWCG	– Clone Wars Campaign Guide	RECG	– Rebellion Era Campaign Guide
		TUR	– The Unknown Regions

Afterward

It seems fitting to look back at the tremendous amount of work that the Rancor Pit community has done in converting the Saga Edition materials and offer some comment. Since the autumn of 2007 a few dedicated members of the Star Wars D6 community saw the possibilities of the new materials being produced by Wizards of the Coast. Though many of Wizards' books evoked varying levels of enthusiasm, it was clear that there was more than enough fan support to merit the collection and conversion of Saga Edition statistics into something usable to the D6 fan. Particularly with new ground being broken with popular eras, such as the Knights of the Old Republic, there was a distinct need for driven and dedicated fans to put forth countless hours into producing works that would be enjoyed. It was only through the support of the fan base that the people who converted the stats could ever have found the energy to complete the task. That support took the form of encouragement and positive criticisms. For that support, I am ever thankful. Those who use these books are in your debt. However, I think none of us can overlook how much we owe the professional eye and talents of Thiago "Gry Sarth" Aranha, who engaged in the tireless task of editing and laying out the PDFs.

As the conversion project pushed on through 2010, we had more downloads than any of us had ever expected. It has been heartening to see how many have joined the Rancor Pit forums on account of the conversion books we have created. It is noteworthy that many of the stats are representative of the creations of Wizards of the Coast, and with any new RPG product there will be mixed reactions. Some of the criticisms that we've received suggest that the stats do not always fit in well with the older standards presented by West End Games, a criticism we well recognize. We encourage you to use, modify, change or discard these stat blocks as you see fit for your games. Should these statistics serve as an inspiration for you to create something different for your game, then so much the better. We are happy the conversion books have done something to help your game and that fits into your vision of the Star Wars galaxy.

Granted, at the end of such an extensive project we are much wiser at this end. It is likely that if we had begun with the same understanding that we have now that some things might have been different; however, not terribly different. Thus, all of us who contributed have good reason to look back and be proud of what we have done over the past few years. All of you who supported us have earned our thanks.

Since the end of the conversions, most of us have moved on to other projects. New paths are being forged in D6, particularly with the debut of Open D6. (Not to say that we are done with Star Wars, by any means.) We encourage you to come by our forums to see the latest ideas that may further your Star Wars or other D6 settings.
